Dear Mr xx

Dear Ms xx

My name is xxx from Smarter Surfaces, we are a manufacturing company that works with schools in the region. We have recently completed a project with the XX School, which I think may be of interest to your school.

In recent years, many schools such as XX school, XX School, XX School, University of XX and many others have chosen to use our products to modernise their facilities and improve their learning process with great results.

We are manufacturers of whiteboard paints and wallpapers with different functionalities. They can transform any smooth surface in the classroom into magnetic, whiteboard and projection. Our products are in high demand in schools and universities across the country. They have a significant impact on teaching and student life and are highly praised by teachers and students alike

The most popular product in the classroom is our Whiteboard Magnetic Canvas Wallpaper. This wallpaper can be installed in just one day, just like any normal wallpaper, and comes with a 10-year warranty. Our product can also be projected with normal projectors and even interactive and short distance projectors. On our website you will find many examples: www.smartersurfaces.com

If you feel that our products can be of real benefit to your students and teachers, I would be happy to talk to you.

If a discussion or samples are of interest, please contact me by email or phone using the details below. I would also be happy to put you in touch with some of the schools we have already worked with.

Kind regards
